```csharp
using System;

public class Student
{
    public string Name { get; set; }
    public int Age { get; set; }
    public string Course { get; set; }

    public Student(string name, int age, string course)
    {
        Name = name;
        Age = age;
        Course = course;
    }

    public void DisplayInfo()
    {
        Console.WriteLine($"Name: {Name}");
        Console.WriteLine($"Age: {Age}");
        Console.WriteLine($"Course: {Course}");
    }
}

class Program
{
    static void Main(string[] args)
    {
        Student student1 = new Student("Seth Sitjar", 23, "BSIT");
        student1.Display
```
